15	mylicenses.html	CleanupOfDirectories	5 days ago	User	UserMode
23	userhelp.html	CleanupOfDirectories	5 days ago	User	UserMode
24	usernotices.html	CleanupOfDirectories	5 days ago	User	UserMode
25	welcome.html	Updates	5 days ago	Corporate Info	UserMode
26	sitemap.html	This is a site template for now.	5 days ago	Corporate Info	UserMode
OTHER					
27	footer area	Corporate			
28	modal page - care ticket	Operations			
29	modal page - sales request	Operations			

There are 26 Main Pages related to this application...at the present... Debating 2 more... time permitting related to userprofiles/corporateprofiles which are very difficult pages.

The instructor said login/logout don't count although they are in fact very important pages for user specific information. We have net 24 now which is 5X more than required.

There are three more areas of corporate information in modal forms

BACKOFFICE REVIEW FOR JS/HTML PAGES

api242.onrender.com -> 34 Tables as of Today....

- Tables are variants of a schema built on C# for CSCE547.
- Although the port is non-trivial from C# to Express.
- We added several new tables for Customer Reviews, Products, Testimonials, and Invoicing as the previous cart was built for date specific sales types. (ticketing), and not for MRC/NRC sales.
- We had to rebuild the cart model and that requires Invoice tables.
- We decided to collapse user/userprofile and rebuild the usermodel from previous so this is an all new SSO.
- We ported an encrypted auth controller from C# to Express which took more than a week.

34 ROUTESx5(Get, Post, PutByID, GetByID, DeleteByID) = 170 ENDPOINTS

const authRoutes = require("./routes/authRoutes");
app.use("/auth", authRoutes);

// -----
// TOTAL ROUTES: 34
// -----
```

GENERAL LAYOUT OF SCREENS.....

(1) Header Nav & Mobile Menus using Material UI in Header Spaces.

- On Previous JSS Development Tools we added UserProfile Links for Account Management.
- We are debating it for this application.

(2) A Topsection Page set up with two subsections:

- A Data Grid (SS1)
- A Features Bar (SS2)
- It is possible for some screens either SS1, or SS2 might not be there.

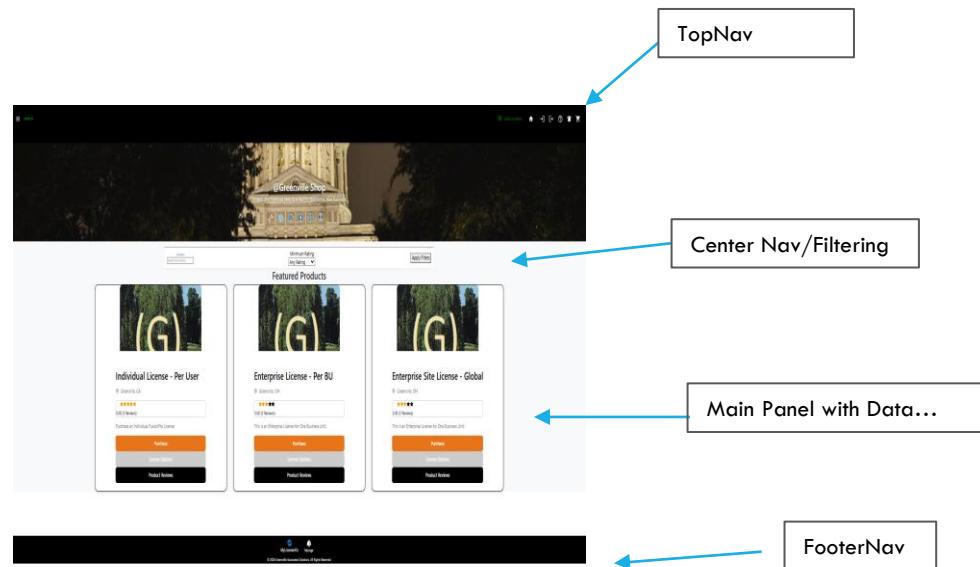

(3) A Bottom Section which is designed to Fill Space in Excess of 800PX.

- It has Quick Links, A Site Map Table, and Two Pictures in a 3 Column Layout.
- On Mobile these are stacked to provide 1500px of fill.

(4) Bottom Nav & Mobile Icons using Material UI in Footer Spaces.

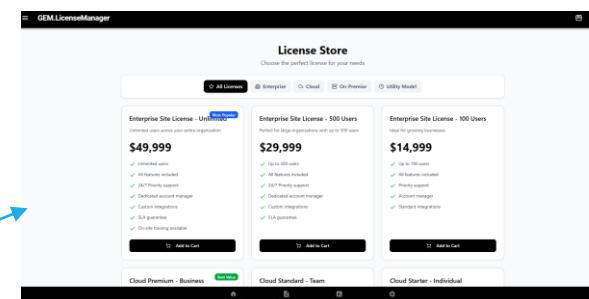

REACT AND HTML TARGETS VIRTUALLY THE SAME AND MIGRATING TO COMMON FORM

Blowout...

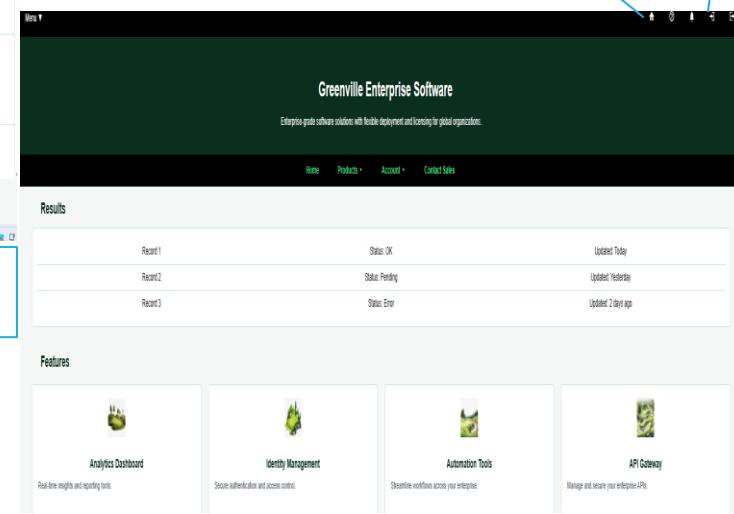

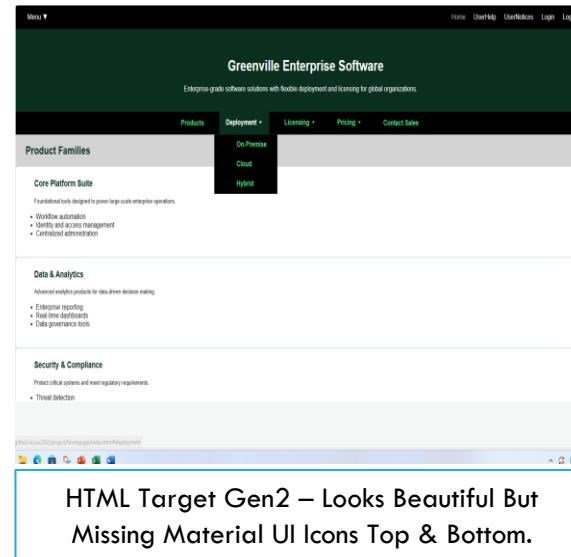

React Legacy EU Model
(Valefar/CG UserStories & Design)
Gen0

The AI Generated Template Built Admin
Pages/Dashboards + New Cart which works.
It is not formatted to match target but the AI build
identified a number of significant options like Settings.

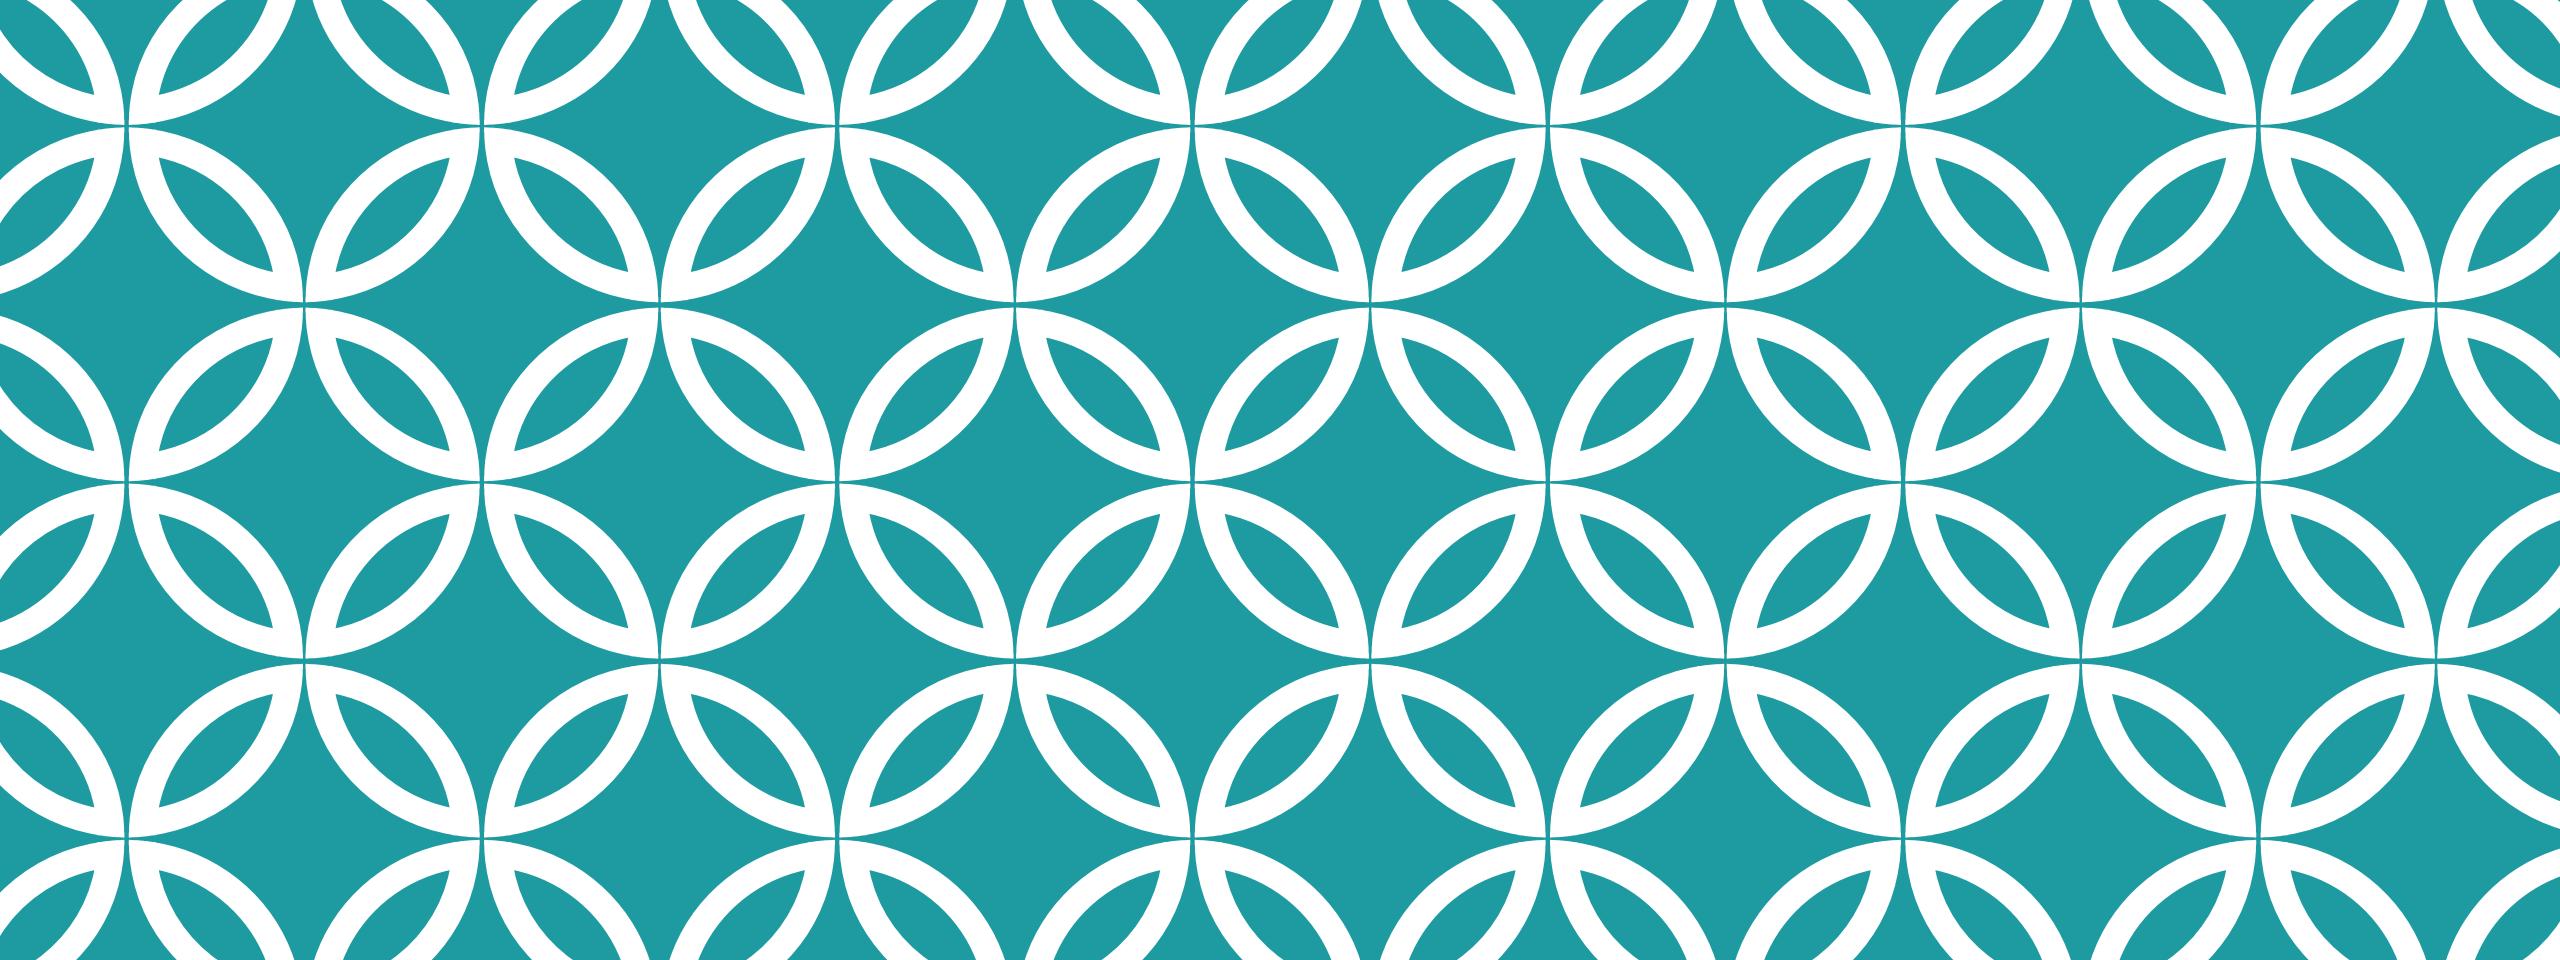

Gen1 – Reverse Engineered UI from JSON

GEN3 with Material-UI Icons on HTML To
replace top and bottom nav by text links...

SCREENS IN 4 BLOCK FORMAT...

All Screens(Current)
Before Target CSS is Universally
Applied to All Tags

BEFORE WE SHOW CURRENT SCREENS.....

We are trying to get Greenvilletwo.css to encompass and consolidate all CSS parameters across all 20+ pages.... Its not quite working right.... 1+ days more...to debug....

Current Screens do not have greenville2.css applied and were developed by Gen-ing the data to REST APIS using bootstrap on copilot.... In other words Copilot builds from REST entire working Grid Arrays with Update, Insert and Delete... given the right prompts/parameters.

Current screens are moving to a common base but we are playing with background screen colors, etc which we haven't quite decided on....

THE TARGET SCREEN IN SECTIONS

1. Top Nav (Main Button Drop), Site Name and Logo, Right Nav Icons.
2. MidPage Heading and Nav (Like Homepage)
3. Main Data/CenterCourt with 2 subsections(Data/Features)
4. BottomFillers (3 x Wide, 1x3 in Media Checker tested and in production)
5. Bottom Nav (Two Icons and Copyright is target)

6. NOTE ALL SCREENS HAVE THE SAME COMPONENTS IN OUR MODEL... THUS SHOWING EACH ONE ISNT REALLY NECESSARY.... IF THEY USE THE SAME CSS.

SECTION 1/2 -> CONSTRUCTING A SCREEN.... TOP SECTION FIRST

SHOPIFY FIGMA PLUGIN VS FUSION COMMERCE

Figma Designer has shopify plugins working.....

This eliminates the need for FusionCart for this application.

Fusion Commerce is a world class ecommerce system with full payment control and supporting of any type of product (reservations/dates, mrcs, nrcs, global, state, regional boundaries).

Fusion Commerce supports Batching to a 3rd Party Accounting System -> SalesOrder -> Foreign POS Systems

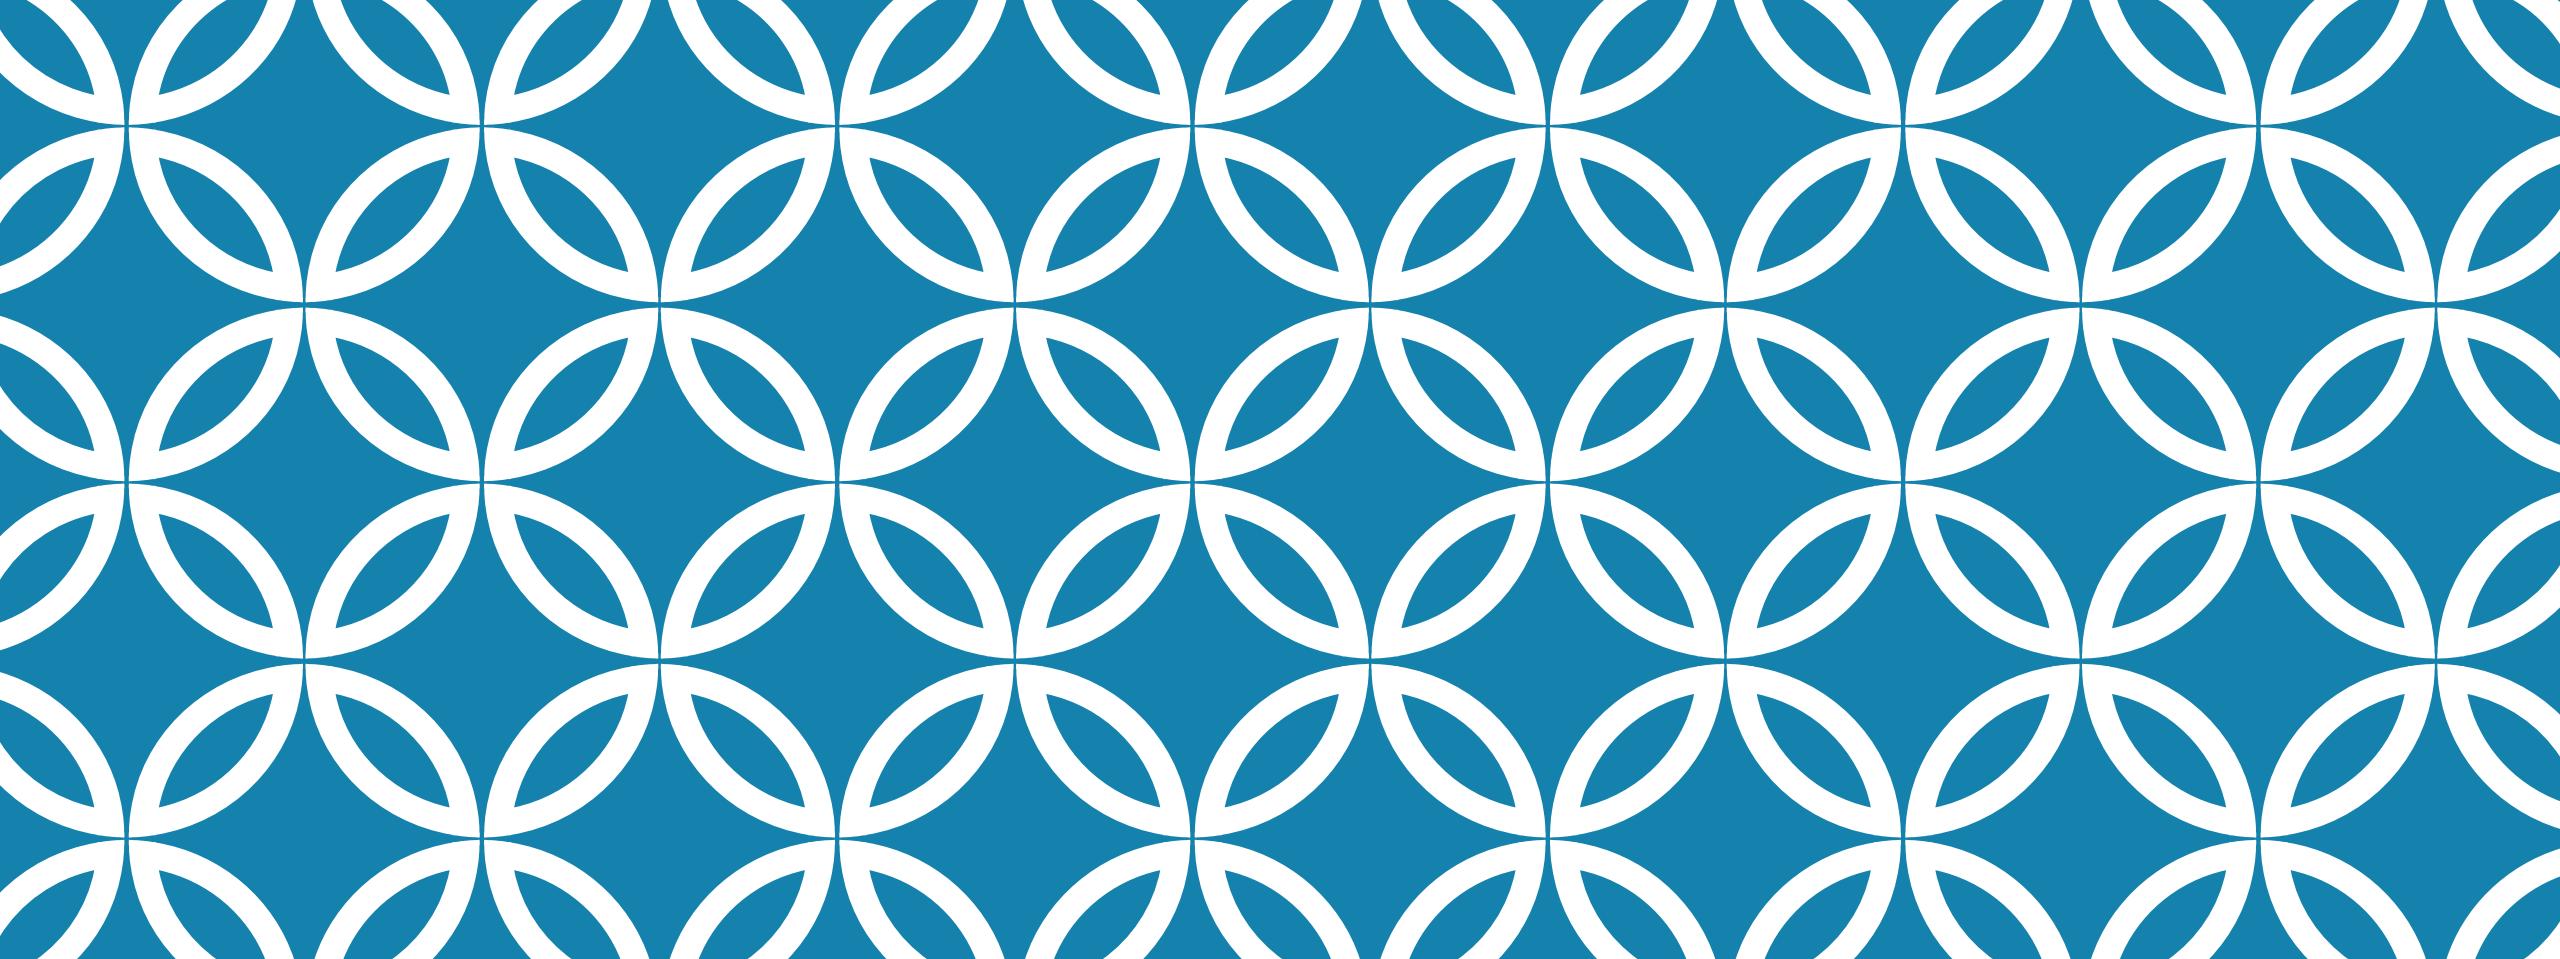

For this class Shopify may or may not be easier... Note if we Make Park Table emulate a Product... we can keep it without modification....so this is an architectural consideration. (This is already done in react UI). In other words if we rename a park a product it works without modification.

OTHER SCREENS

Figma has a onesy... which shows products, product reviews, and testimonials in the Main Data Area.... This should be table driven to an API... so its not a new screen it's a recast on the home page...

In the end.... We envision a main sales page....

- And once a user logs in... its pure operational....
- View Licenses, View LicenseLogs, Buy New Licenses, Upgrade Licenses...
- To Upgrade a License... each product has to have an upgrade path(SKU), and price for the upgrade SKU.... In place... this needs to be table driven.

CART PAGES UNDER CONSTRUCTION

2/17/2029

Cart Pages... have not been yet ported from G/A 547Bikes.info yet... but are numerous.... Target to match G/A corporate colors, and MRC/NRC driven products which already exist in pricing tables... Bikes sells tickets, and MRC/NRC Items today

This screenshot shows the MyLinkv25 administrative interface for park management. It includes sections for Park Info (listing park details like ID, name, address, and contact info), Reservation Details (showing booking history and status), and Products (listing various items or services). The interface uses a light blue and white color scheme.

Book55.html

This screenshot shows the MyLinkv25 administrative interface, similar to the previous one but with a different layout. It includes sections for Park Info (listing park details like ID, name, address, and contact info) and Products (listing various items or services). The interface uses a light blue and white color scheme.

Cart5.html...

This screenshot shows the MyLinkv25 administrative interface, specifically the cart summary page. It displays a table of items in the cart, including details like item ID, user ID, park name, park ID, item description, total items, total price, start date, end date, adults, kids, and bankings. Below the table is a green "Pay Now" button. The interface uses a light blue and white color scheme.

Payments8.html

This screenshot shows the MyLinkv25 administrative interface, specifically the payment gateway page. It displays a table of credit card options for selection, including card type, vendor, last 4 digits, expiration, billing zip, and action buttons for pay and update. The interface uses a light blue and white color scheme.

Paynow2.html before payment....

There are more than 5 admin pages for Cart Dashboard Data... And Reservation/Invoice Management.

Other CART Pages

This screenshot shows a payment gateway interface titled "Choose a Credit Card". It displays a table of available cards:

Card Type	Issuer	Last 4 Digits	Expiration	Billing Zip	Action
Discover	Bank of America	3221	04/2026	29201	<button>Pay \$0.01 Update</button>
VISA	Wells Fargo	3235	11/25	29201	<button>Pay \$0.01 Update</button>
Ameri	Chase Bank	6834	2025/05	29201	<button>Pay \$0.01 Update</button>

Below the table, there is a note about a previous transaction and some user ID information. At the bottom, there is a "Review My Reservation" button.

Paynow2.html -> After Payment

This screenshot shows a transaction summary page titled "MyLinks25 - Review Parks". It displays the following details:

Transaction Summary

Cart ID: 350
Park Name: Revolution MX Park
Park ID: 1168
User ID: 1
Status: Checked Out
Payment ID: HDO130836
Total Items: 1
Total Price: 66.96
Trans Date: 2/7/2026
Start Date: 2026-02-03
End Date: 2026-02-04

Cart Items

Start	End	Description	Qty	Price	Subtotal	State Tax	Local Tax	Total
2026-02-03	2026-02-04	Revolution MX Park Adults: 5 Children: 2	4	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00

At the bottom, there is a copyright notice for "© Cody Consulting 2025. All rights reserved." and a "Site Map" link.

Cartdetail.html shows a single transaction.

This screenshot shows a complex reservation management page titled "MyLinks25 - MyReservations". It features a large image of people rafting. Below it, there are two sections: "Active Reservations" and "Cancelled Reservations".

Active Reservations

BookingID	User ID	Park ID	Card ID	Park Name	Booking Start	Booking End	Adults	Children	Total (\$)	Transaction ID#	Booking Type	Booking Status	Actions
109	1	159	83029	undefined	2025-11-10T000000	2025-11-10T000000	1	0	0.01	Q511394745	Biking	Active	<button>Review Cart</button> <button>Cancel</button>

106	1	1168	358	undefined	2026-02-03T000000	2026-02-04T000000	2	2	66.96	HDO130836	Biking	Active	<button>Review Cart</button> <button>Cancel</button>

At the bottom, there is a copyright notice for "© Cody Consulting 2025. All rights reserved." and a "Site Map" link.

MyReservations is a very very complicated page... with option to cancel pending reservations.

This screenshot shows a confirmation dialog for canceling a reservation. It displays the following details:

Booking Details

Booking ID: 109
User ID: 1
Billing Telephone: 8041111234
Credit Card Type: Discover
Card Last 4: 3321
Card Expiry: 04/2026
Billing Name: John S. Stritzinger III
Adults: 1
Children: 0
Total Amount: \$0.01
Transaction ID: Q511394745
Reverse Transaction ID:
Refund Amount: \$0.00
Park ID: 159
Park Name: Skyline MX Park
Card ID: 83029
Reservation Type: Biking
Reservation Status: Active

Are you sure you want to cancel this reservation?

At the bottom, there is a copyright notice for "© Cody Consulting 2025. All rights reserved." and a "Site Map" link.

CartCancel -> Cancels a Reservation and Reverses Charges to a Credit Card...
