25	<a href="#">welcome.html</a>	<a href="#">Updates</a>	5 days ago	Corporate Info	UserMode
26	<a href="#">sitemap.html</a>	<a href="#">This is a site template for now.</a>	5 days ago	Corporate Info	UserMode
OTHER					
27	footer area	Corporate			
28	modal page - care ticket	Operations			
29	modal page - sales request	Operations			

There are 26 Main Pages related to this application...at the present... Debating 2 more... time permitting related to userprofiles/corporateprofiles which are very difficult pages.

The instructor said login/logout don't count although they are in fact very important pages for user specific information. We have net 24 now which is 5X more than required.

There are three more areas of corporate information in modal forms

# BACKOFFICE REVIEW FOR JS/HTML PAGES

api242.onrender.com -> 34 Tables as of Today....

- Tables are variants of a schema built on C# for CSCE547.
- Although the port is non-trivial from C# to Express.
- We added several new tables for Customer Reviews, Products, Testimonials, and Invoicing as the previous cart was built for date specific sales types. (ticketing), and not for MRC/NRC sales.
- We had to rebuild the cart model and that requires Invoice tables.
- We decided to collapse user/userprofile and rebuild the usermodel from previous so this is an all new SSO.
- We ported an encrypted auth controller from C# to Express which took more than a week.

34 ROUTESx5(Get, Post, PutByID, GetByID, DeleteByID) = 170 ENDPOINTS

```

// -----
```

# GENERAL LAYOUT OF SCREENS.....

## (1) Header Nav & Mobile Menus using Material UI in Header Spaces.

- On Previous JSS Development Tools we added UserProfile Links for Account Management.
- We are debating it for this application.

## (2) A Topsection Page set up with two subsections:

- A Data Grid (SS1)
- A Features Bar (SS2)
- It is possible for some screens either SS1, or SS2 might not be there.

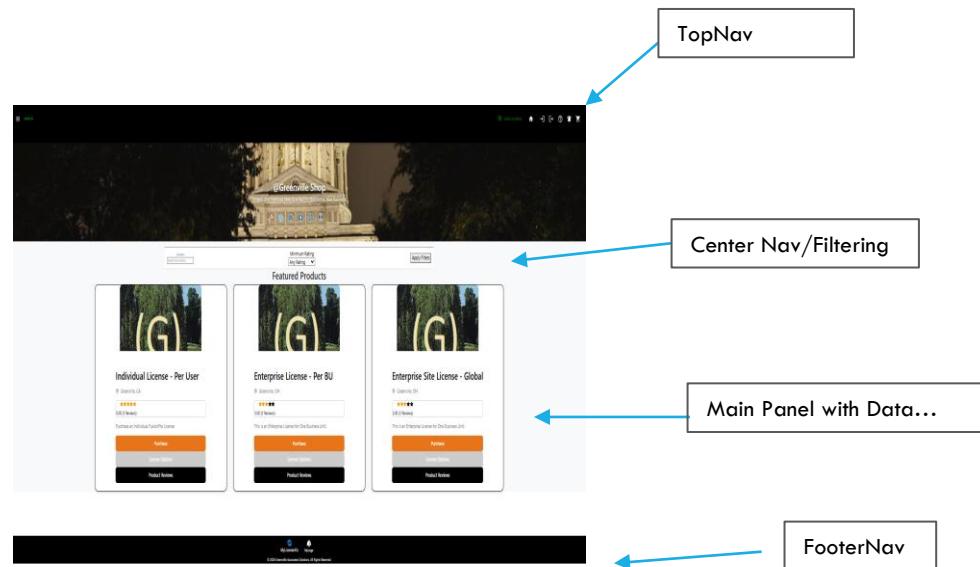

## (3) A Bottom Section which is designed to Fill Space in Excess of 800PX.

- It has Quick Links, A Site Map Table, and Two Pictures in a 3 Column Layout.
- On Mobile these are stacked to provide 1500px of fill.

## (4) Bottom Nav & Mobile Icons using Material UI in Footer Spaces.

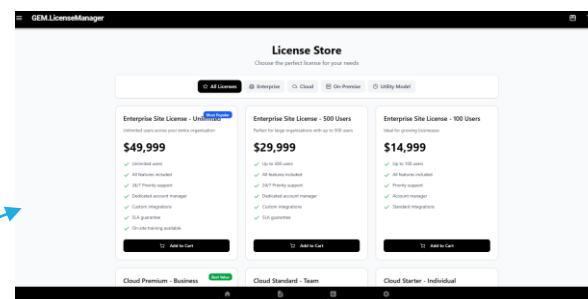

# REACT AND HTML TARGETS VIRTUALLY THE SAME AND MIGRATING TO COMMON FORM

Blowout...

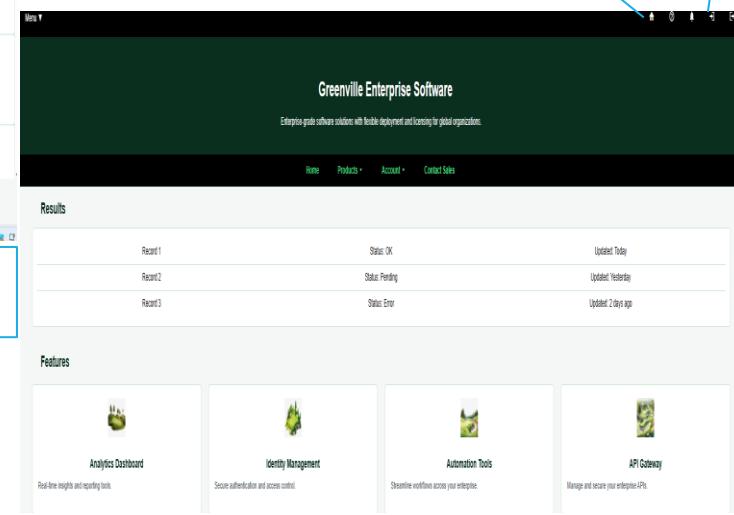

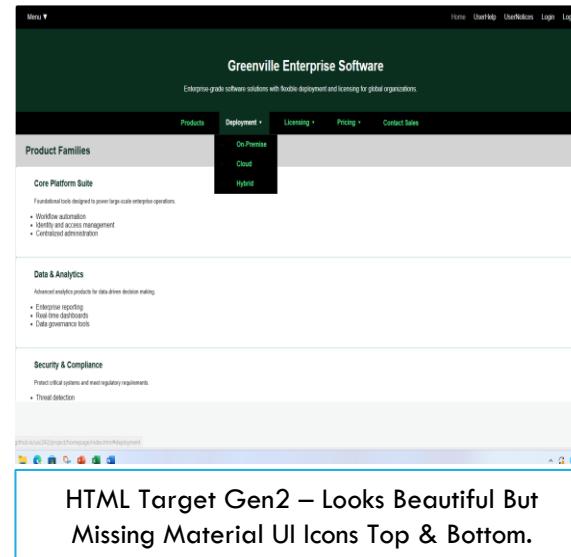

React Legacy EU Model  
(Valefar/CG UserStories & Design)  
Gen0

The AI Generated Template Built Admin  
Pages/Dashboards + New Cart which works.  
It is not formatted to match target but the AI build  
identified a number of significant options like Settings.

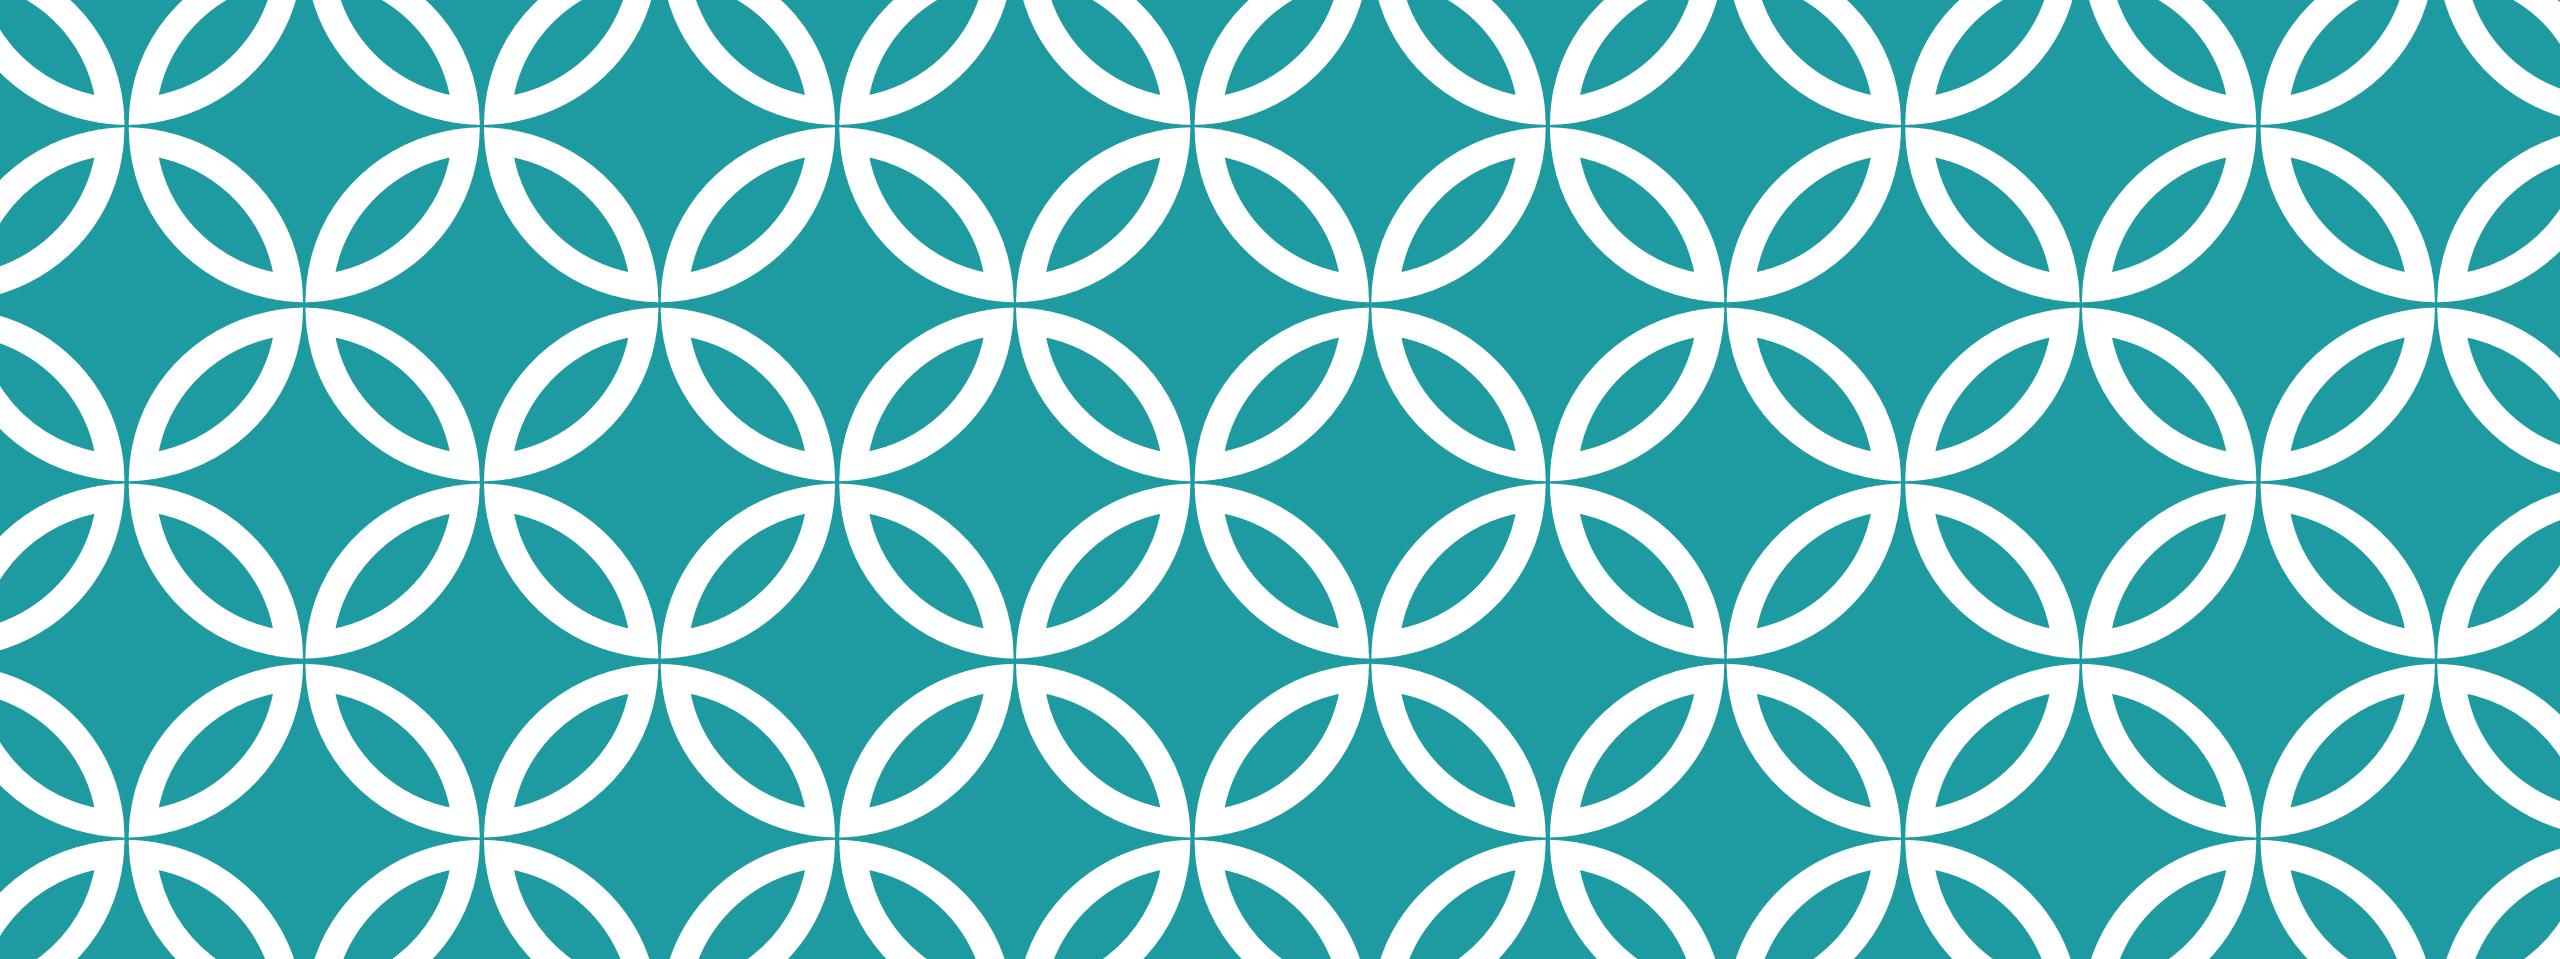

Gen1 – Reverse Engineered UI from JSON

GEN3 with Material-UI Icons on HTML To  
replace top and bottom nav by text links...

# SCREENS IN 4 BLOCK FORMAT...

All Screens(Current)  
Before Target CSS is Universally  
Applied to All Tags

# BEFORE WE SHOW CURRENT SCREENS.....

We are trying to get Greenvilletwo.css to encompass and consolidate all CSS parameters across all 20+ pages.... Its not quite working right.... 1+ days more...to debug....

Current Screens do not have greenville2.css applied and were developed by Gen-ing the data to REST APIS using bootstrap on copilot.... In other words Copilot builds from REST entire working Grid Arrays with Update, Insert and Delete... given the right prompts/parameters.

Current screens are moving to a common base but we are playing with background screen colors, etc which we haven't quite decided on....

# THE TARGET SCREEN IN SECTIONS

1. Top Nav (Main Button Drop), Site Name and Logo, Right Nav Icons.
2. MidPage Heading and Nav (Like Homepage)
3. Main Data/CenterCourt with 2 subsections(Data/Features)
4. BottomFillers (3 x Wide, 1x3 in Media Checker tested and in production)
5. Bottom Nav (Two Icons and Copyright is target)
  
6. NOTE ALL SCREENS HAVE THE SAME COMPONENTS IN OUR MODEL... THUS SHOWING EACH ONE ISNT REALLY NECESSARY.... IF THEY USE THE SAME CSS.

## SECTION 1/2 -> CONSTRUCTING A SCREEN.... TOP SECTION FIRST

# SHOPIFY FIGMA PLUGIN VS FUSION COMMERCE

Figma Designer has shopify plugins working.....

This eliminates the need for FusionCart for this application.

Fusion Commerce is a world class ecommerce system with full payment control and supporting of any type of product (reservations/dates, mrcs, nrcs, global, state, regional boundaries).

Fusion Commerce supports Batching to a 3<sup>rd</sup> Party Accounting System -> SalesOrder -> Foreign POS Systems

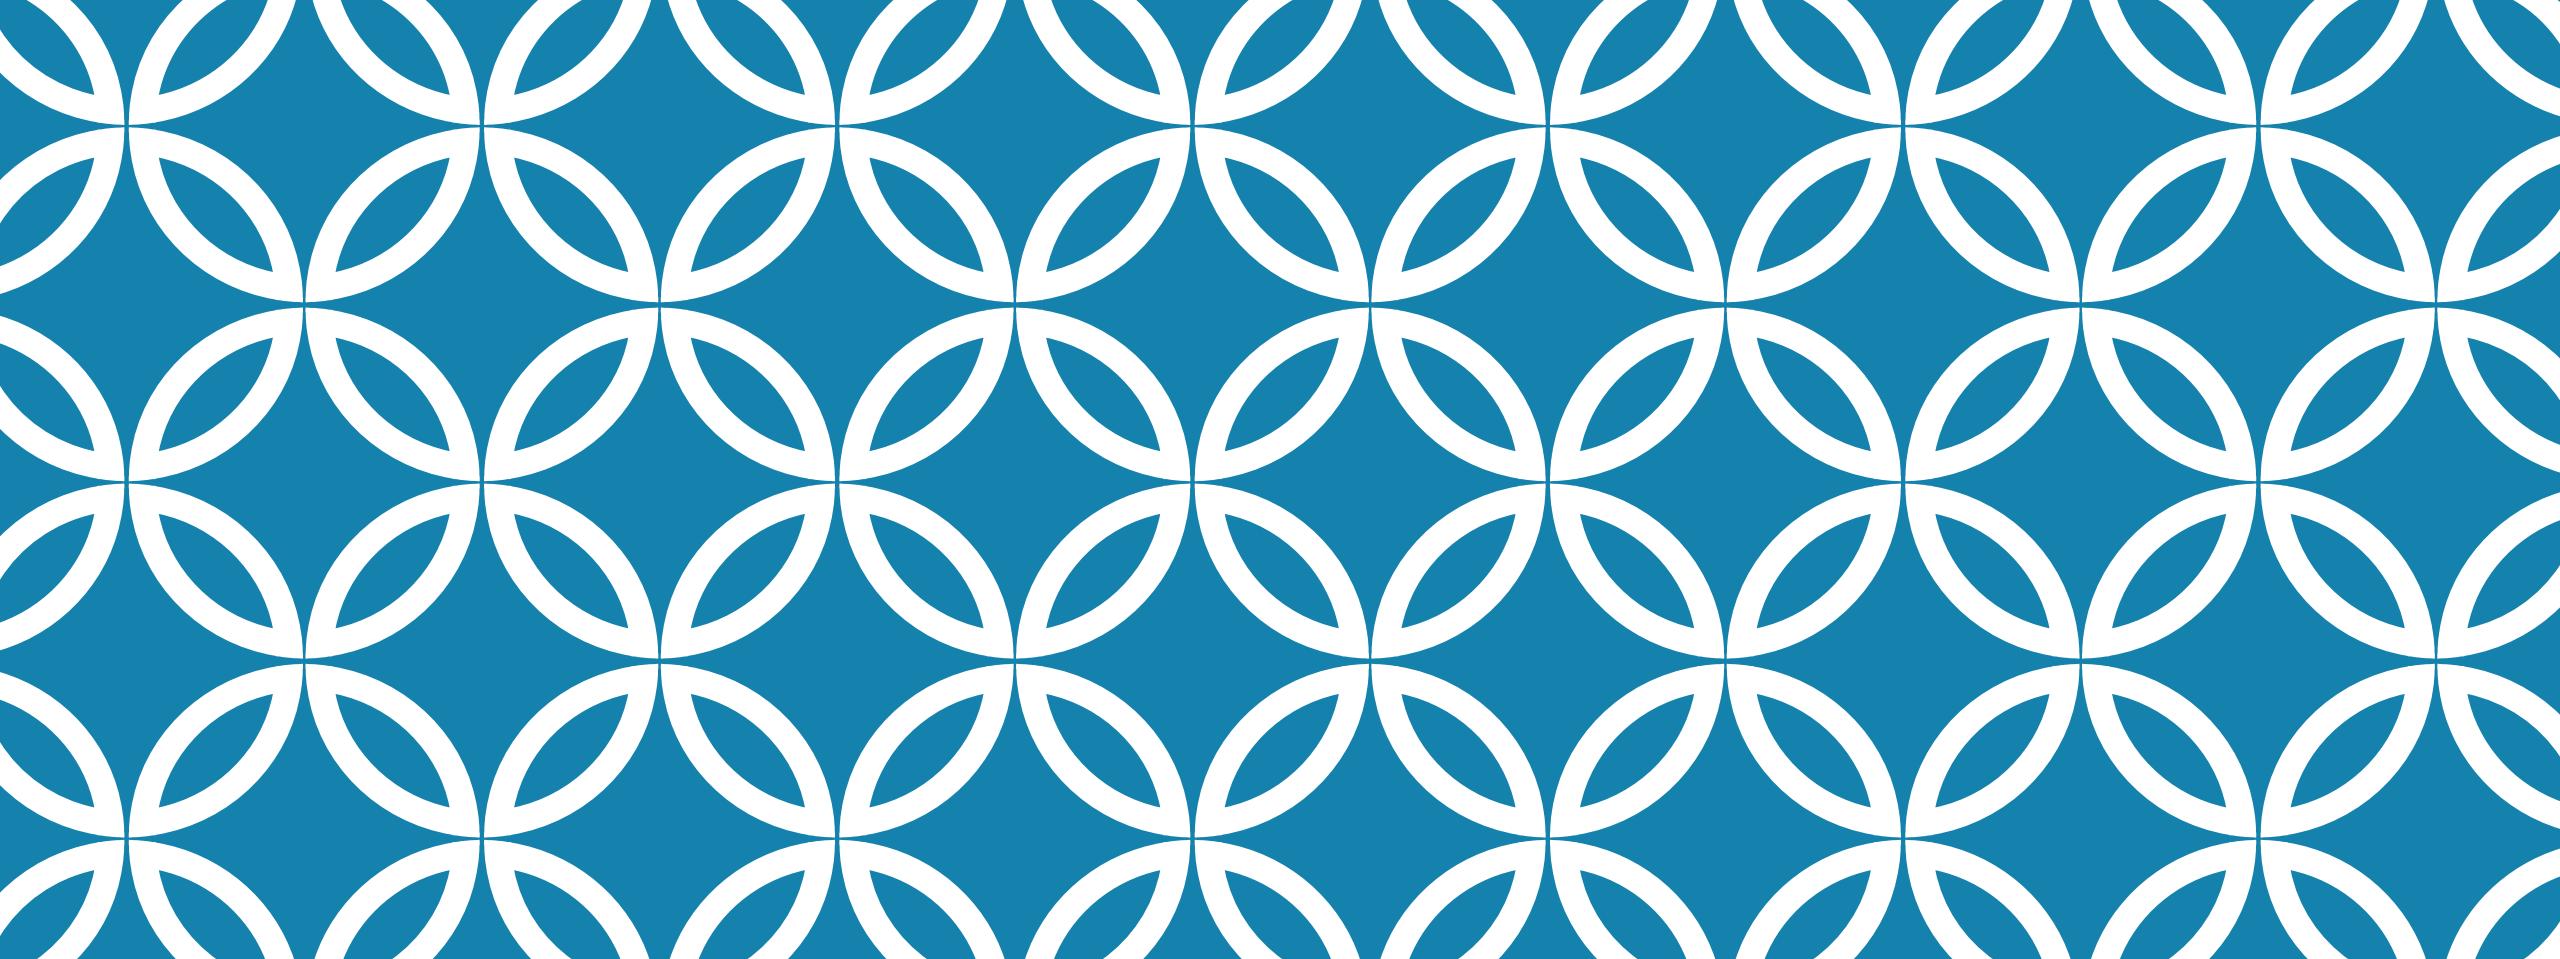

For this class Shopify may or may not be easier... Note if we Make Park Table emulate a Product... we can keep it without modification....so this is an architectural consideration. (This is already done in react UI). In other words if we rename a park a product it works without modification.

# OTHER SCREENS

Figma has a onesy... which shows products, product reviews, and testimonials in the Main Data Area.... This should be table driven to an API... so its not a new screen it's a recast on the home page...

In the end.... We envision a main sales page....

- And once a user logs in... its pure operational....
- View Licenses, View LicenseLogs, Buy New Licenses, Upgrade Licenses...
- To Upgrade a License... each product has to have an upgrade path(SKU), and price for the upgrade SKU.... In place... this needs to be table driven.

**CART PAGES UNDER CONSTRUCTION**

2/17/2029

Cart Pages... have not been yet ported from G/A 547Bikes.info yet... but are numerous.... Target to match G/A corporate colors, and MRC/NRC driven products which already exist in pricing tables... Bikes sells tickets, and MRC/NRC Items today

This screenshot shows the MyLinkv25 administrative interface for park management. It includes sections for Park Info (listing park details like ID, name, address, and contact info), Reservation Details (showing booking history and status), and Products (listing various items or services). The interface uses a light blue and white color scheme.

Book55.html

This screenshot shows a cart summary page for a user named "Mobile Mayhem". It displays the total price (\$14.00), quantity (2), and date added (2024-11-10). Below the cart summary are two payment buttons: "Select for Payment" and "Remove from Cart". A large blue "Checkout" button is prominently displayed at the bottom.

Cart5.html...

This screenshot shows a cart summary page with a single item: "Skyline Mt Park" (Corporation) with a total price of \$0.01. A green "Pay Now" button is visible on the right side of the page.

Payments8.html

This screenshot shows a "Choose a Credit Card" page. It lists three cards: Discover, Visa, and Amex, each with a vendor name, last 4 digits, expiration date, and a "Pay Now" button. A "Review My Payments" button is located at the bottom right.

Paynow2.html before payment....

There are more than 5 admin pages for Cart Dashboard Data... And Reservation/Invoice Management.

## Other CART Pages

This screenshot shows a "Choose a Credit Card" interface. It displays a table of cards with columns: Card Type, Vendor, Last 4 Digits, Expiration, Billing Zip, and Actions. The table includes rows for Discover, Bank of America, Visa, American Express, and Chase Bank. Each row has a "Pay Now" button and a "Update" link. Below the table, there is a note about a previous payment, transaction ID, cart ID, user ID, and a "Review My Reservations" button.

Paynow2.html -> After Payment

This screenshot shows a "Transaction Summary" page for a transaction ID of 356. The summary includes details like Park Name (Revolution MX Park), Park ID (1168), User ID (1), Status (Checked Out), Payment ID (HDDL130836), Total Items (1), Total Price (\$6.96), Transaction Date (2/7/2026), Start Date (2026-02-03), and End Date (2026-02-04). Below this is a "Cart Items" table with one item: Revolution MX Park, Adults: 1, Children: 2, and a total price of \$6.96. At the bottom, there is a copyright notice for © Coky Consulting 2005 and a "Site Map" link.

Cartdetail.html shows a single transaction.

This screenshot shows a "MyReservations" page with a grid of active reservations. The columns include Booking ID, User ID, Park ID, Park Name, Booking Start, Booking End, Adults, Children, Total (\$), Transaction ID, Booking Type, Booking Status, and Actions. The transactions listed are:

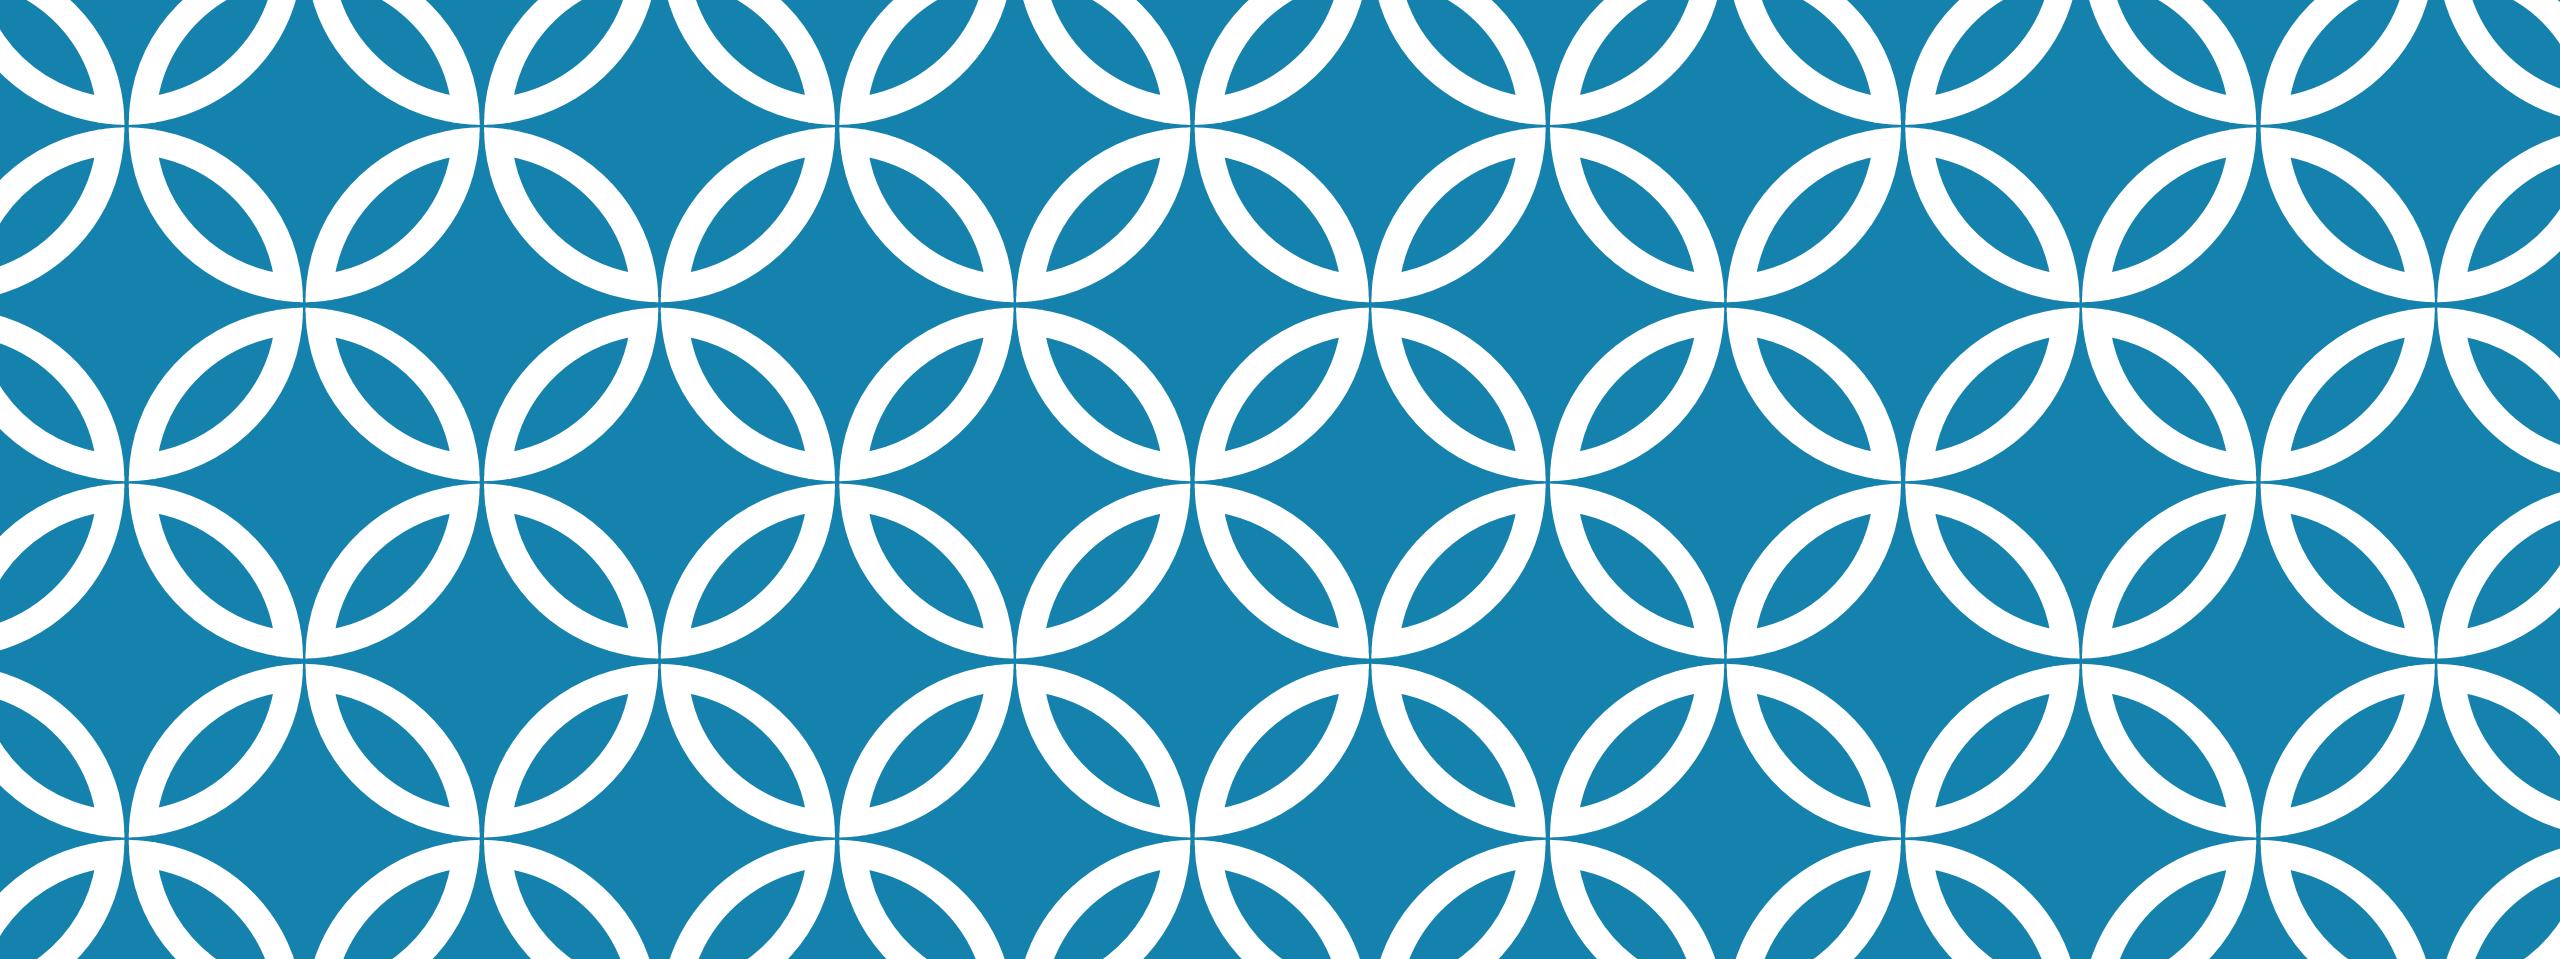

Booking ID	User ID	Park ID	Park Name	Booking Start	Booking End	Adults	Children	Total (\$)	Transaction ID	Booking Type	Booking Status	Actions	
109	1	159	83029	undefined	2025-11-10T00:00:00	2025-11-10T00:00:00	1	0	0.01	Q511394745	Biking	Active	<button>Review Cart</button> <button>Cancel</button>
108	1	159	83028	undefined	2025-11-10T00:00:00	2025-11-10T00:00:00	1	0	0.01	GJF79344601	Biking	Active	<button>Review Cart</button> <button>Cancel</button>
107	1	1168	995382	undefined	2026-02-03T00:00:00	2026-02-04T00:00:00	2	0	66.96	HDDL130836	Biking	Audit	<button>Review Cart</button> <button>Cancel</button>
106	1	1168	358	undefined	2026-02-03T00:00:00	2026-02-04T00:00:00	2	2	66.96	HDDL130836	Biking	Active	<button>Review Cart</button> <button>Cancel</button>

At the bottom, there is a "Cancelled Reservations" section and a copyright notice for © Coky Consulting 2005.

MyReservations is a very very complicated page... with option to cancel pending reservations.

This screenshot shows a "Booking Details" page for a booking ID of 109. The details include User ID (1), Billing Telephone (8041111234), Credit Card Type (Discover), Card Last 4 (3321), and Card Expiry (04/2026). The booking information matches the one shown in the MyReservations page. A confirmation dialog box asks if the user is sure they want to cancel the reservation, with "Confirm Cancellation" and "Go Back" buttons. At the bottom, there is a copyright notice for © Coky Consulting 2005 and a message stating "Location data not available. Your IP address is not available".

CartCancel -> Cancels a Reservation and Reverses Charges to a Credit Card...

# MODIFICATIONS

2/22/2026

# MODS

We modified the entire cart to working with the MongoDB back-end rather than the parks api... this was a major work effort... furthermore the Parks API had lots of intermediate endpoints and services which took MONTHS to build...

We are about 65% interoperable at this point... Reads Work, but Updates, and Posts are spotty due to referential integrity on key fields.

We rebuilt the home page, ***and moved pricing and deployment*** details to separate pages. We built a sales wizard page that calculates a price after asking some questions....

Interior Nav is complicated and is not completely modeled.

# USER STORY

Homepage unprotected from SSO Privacy.....

Attempting to Buy Something..... Forces login....

Login.Html updates SSO data/user profile in LocalStorage

All other ops pages PLL Protected(Page Level Locking) to uid in LocalStorage.

After Login -> Force to MyLicenses -> Options to Buy More/Upgrade.

Other Operational Items on Drop Menu.

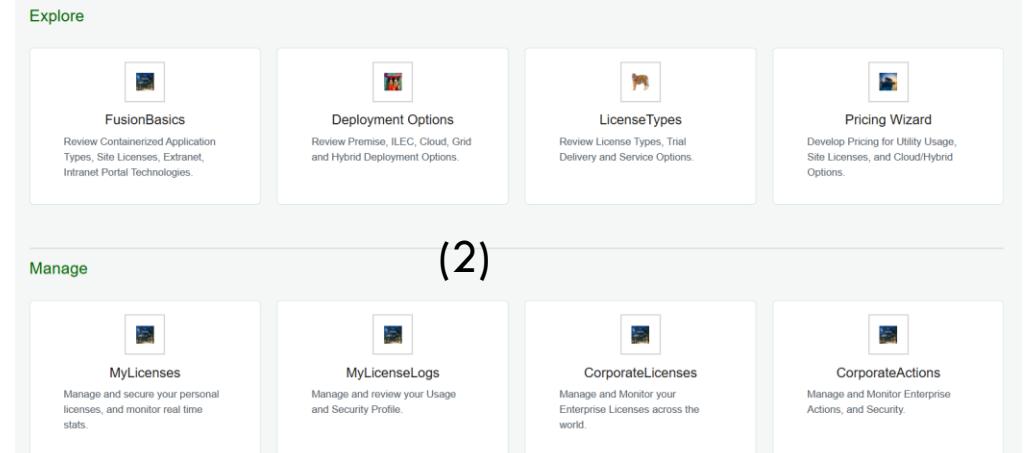

# NEW HOMEPAGE...

The screenshot shows the Greenville Enterprise Software homepage. At the top, there's a dark header bar with a "Menu" dropdown and several icons. Below it is a green banner with the text "Greenville Enterprise Software" and a subtitle "Enterprise-grade software solutions with flexible deployment and licensing for global organizations." The main navigation menu includes "Products," "Deployment," "Licensing," "Pricing," and "Contact Sales." A large, dark slide show area with a white circular pattern is centered below the menu. At the bottom, there are four small thumbnail images showing different software interfaces.

(1) Consider Slide Show with Iframe....

## MIDSECTION.....

This section of the website is titled "Explore" and "Manage". It contains several cards with icons and descriptions:

- Explore**
  - FusionBasics: Review Containerized Application Types, Site Licenses, Extranet, Intranet Portal Technologies.
  - Deployment Options: Review Premise, ILEC, Cloud, Grid and Hybrid Deployment Options.
  - LicenseTypes: Review License Types, Trial Delivery and Service Options.
  - Pricing Wizard: Develop Pricing for Utility Usage, Site Licenses, and Cloud/Hybrid Options.
- Manage**
  - MyLicenses: Manage and secure your personal licenses, and monitor real time stats.
  - MyLicenseLogs: Manage and review your Usage and Security Profile.
  - CorporateLicenses: Manage and Monitor your Enterprise Licenses across the world.
  - CorporateActions: Manage and Monitor Enterprise Actions, and Security.

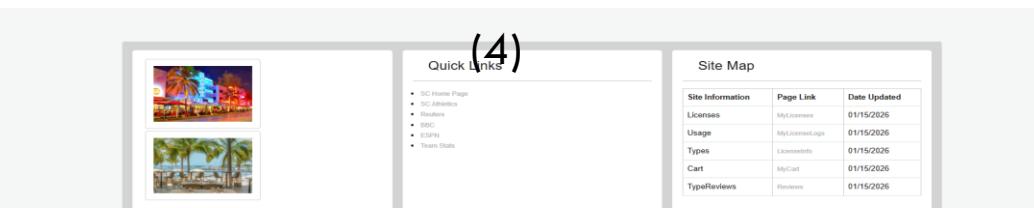

(2)

This section displays "FusionShell Open Current Releases" and "FusionShellPro V5.01 Current Releases". Each release card includes an icon, title, variant, version, modules, and update date:

- FusionShell Open Current Releases**
  - Variant: ExtrandBuild  
Version: Open25  
Modules: Sales, Marketing, Shop
  - Variant: IntranetBuild  
Version: Open25  
Modules: Sales, Marketing, Shop
  - Variant: ERPCore  
Version: Open25  
Modules: Accounting, HR, Forms, Mobile
- FusionShellPro V5.01 Current Releases**
  - Variant: SalesOperations  
Version: 5.01  
Modules: Sales, Marketing, Shop, LunaAI, MobileWeb, Mobile, GEM, FusionCommerce, Proj9, Security

(3)

This section includes "Quick Links" and a "Site Map". The "Quick Links" area has two cards with icons and lists:

- SC Home Page
- SC Athletics
- SC News
- SC Events
- SC Team Stats

The "Site Map" table provides a detailed breakdown of site information, page links, and last updated dates:

Site Information	Page Link	Date Updated
Licenses	MyLicenses	01/15/2026
Usage	MyLicensedLogs	01/15/2026
Types	LicenseTypes	01/15/2026
Cart	MyCart	01/15/2026
TypeReviews	TypeReviews	01/15/2026

(4)

The footer features a "Talk to Sales" button and a "Contact our enterprise sales team to discuss licensing, pricing, and deployment options." message. It also includes a "Site Information" table with columns for Site Information, Page Link, and Date Updated.

## LIGHT GREEN SHOWING 2<sup>ND</sup> DRAFT

Cart Pages... Have been ported in Part to ./fusioncommerce... to the same UserFlows we think were accurate...but with a twist

This screenshot shows the 'Licensing' section of the application. It displays three product cards:

- FSPROV601-10CAL**: Description: LOCAL - FusionShell Professional V6.01. Qty On Hand: 50. List Price: \$199.99. Vendor: Greenville Associates. Record ID: 698753262ab1a295fb29268.
- FusionProV6.01.CAL**: Description: 1 CAL - FusionProV6 All Modules. Qty On Hand: 100. List Price: \$1020.00. Vendor: Greenville Associates. Record ID: 698753262ab1a295fb29268.
- FSPROV601-100CAL**: Description: 100CAL - FusionShell Professional V6.01 - All Modules. Qty On Hand: 100. List Price: \$1000.00. Vendor: Greenville Associates. Record ID: 698753262ab1a295fb29268.

Each card has 'Buy Product', 'View Reviews', and 'More Info' buttons.

Licenses6.html  
Has Replaced  
Parks5.html &  
Is Finished.

This screenshot shows the 'Purchase555.html' page. It includes a 'Product Review' section and a 'User CartMaster Summary' section. A blue arrow points from the 'Purchase555.html' text above to the 'User CartMaster Summary' section.

**User CartMaster Summary**

User ID:	1
Login ID:	Guest
Cart Count:	7
Active Cart(s):	7
Canceled Cart(s):	0
Total Value:	\$14,497.73
Subtotal:	\$14,497.73
Tax:	\$0.00
Grand Total:	\$14,497.73

**Product Info**

Current Product: FSPROV601-10CAL - LOCAL - FusionShell Professional V6.01  
Selected Product: FSPROV601-10CAL - LOCAL - FusionShell Professional V6.01

Description: 10CAL - FusionShell Professional V6.01  
Price: \$199.99  
Qty On Hand: 50  
Vendor: Greenville Associates  
Warehouse: 997

**Product Options**

Enter Value: Quantity: 1  
Start Date (optional): 2023-07-01  
End Date (optional): 2023-07-01

**Preferences**

Gift Wrap: Express Shipping: Add Insurance

**Products**

Product	Actions	Selected
1 CAL - FusionShell Professional V6.01 - LOCAL - FusionShell Professional V6.01 - All Modules	Add New   Remove Item	Description: LOCAL - FusionShell Professional V6.01 - All Modules Price: \$199.99 Qty: 1 Subtotal: \$199.99 Tax: \$0.00 Grand Total: \$199.99

Book555.html  
Has been  
replaced with  
Purchase555.html  
Which works  
similarly...except  
now showing corp

This screenshot shows the 'CartReview.html' page. It features a grid of cart items and a 'Payment Summary' section at the bottom.

**Payment Summary**

Card Type	Vendor	Last 4 Digits	Expiration	Billing Zip	Action
Visa	WellsFargo	3321	12/29	29201	<b>Pay \$1994.99</b>   Update Card

CartReview.html Is  
Unchanged And  
Works just as well..

Payments8.html is  
now working more  
or less the same...

This screenshot shows the 'Paynow2.html' page before payment. It displays a 'Choose a Credit Card' form.

**Choose a Credit Card**

Add Card

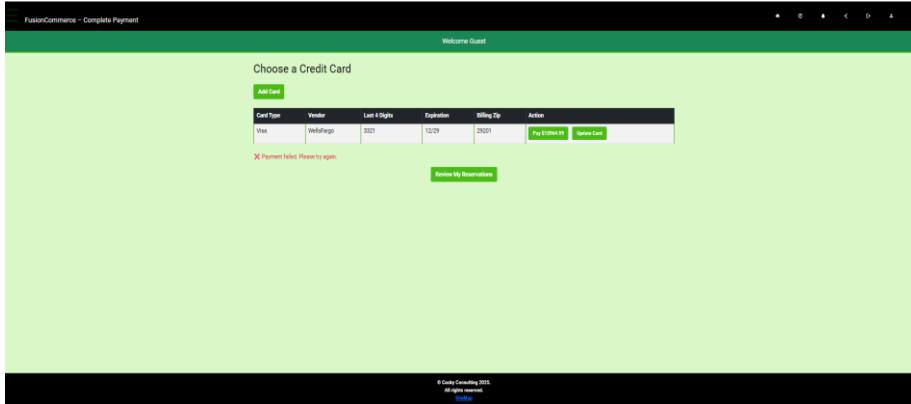

Card Type	Vendor	Last 4 Digits	Expiration	Billing Zip	Action
Visa	WellsFargo	3321	12/29	29201	<b>Pay \$1994.99</b>   Update Card

**Review My Reservations**

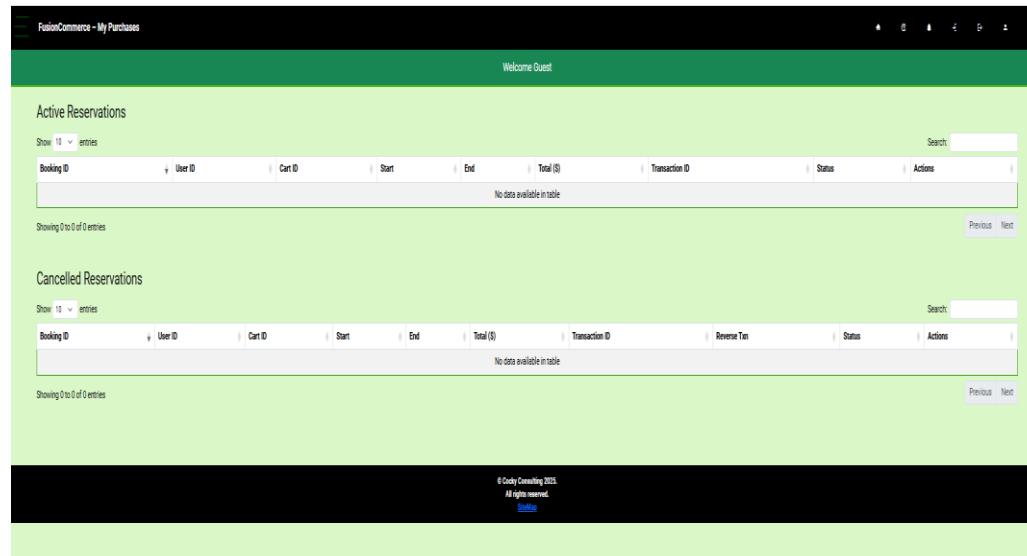

Paynow2.html before payment.... Is Unchanged

There are more than 5 admin pages for Cart Dashboard Data... And Reservation/Invoice Management.

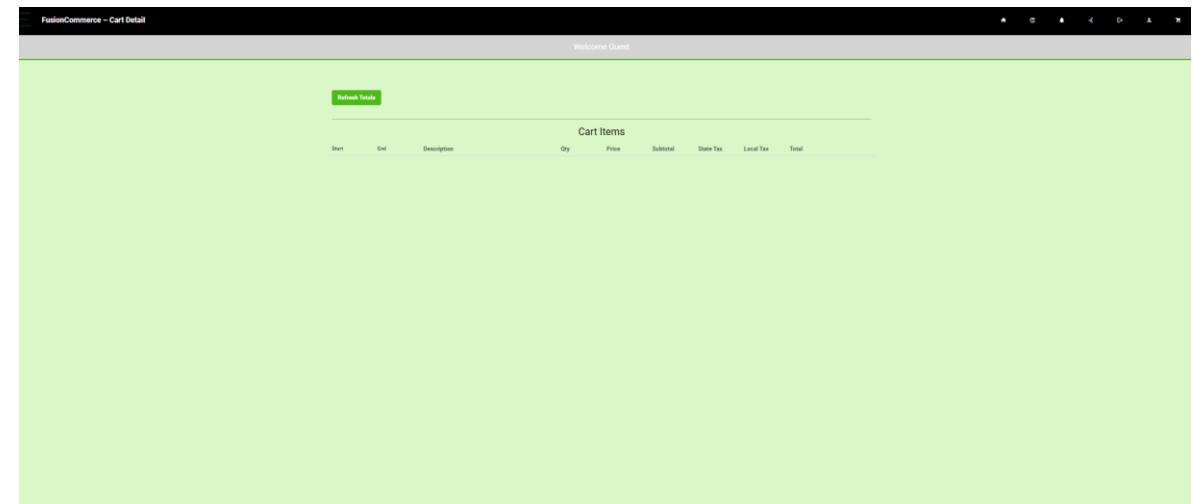

## Other CART Pages

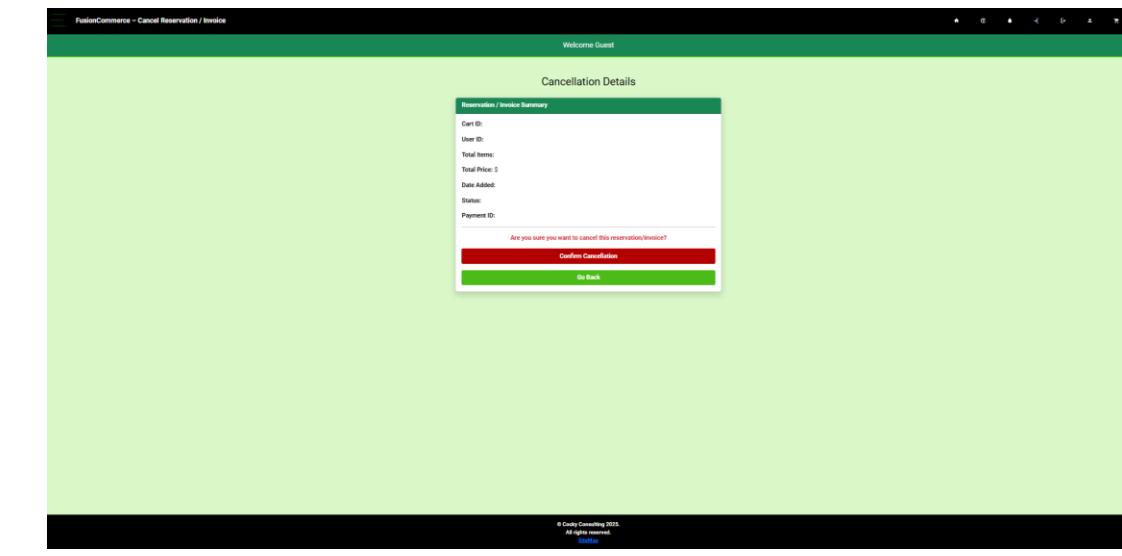

Paynow2.html -> After Payment – Different BackEnd – Working Partially.

MyPurchases has replaced MyReservations. It works the same more or less. But now supports invoices as well as reservations (more complicated)

Cartdetail.html shows a single transaction. Unchanged.

CartCancel -> Cancels a Reservation and Reverses Charges to a Credit Card...
